Job Description

We are currently expanding our software team and are looking for a Junior Software Developer with a passion for coding. This role will be ideal for someone with ideally at least 2+ year’s commercial experience and wants to push their career further and take the next step up. Occasional travel be may be required for this full-time role.

Either way, you will be obsessed with Software Development and love the challenge of problem-solving and creating. Keen to learn, open to new ideas and challenging yourself to constantly improve. Opportunity to progress and take on more responsibilities within the team, working alongside the existing development team but with opportunities for training and certifications.

Key responsibilities of Junior Software Developer:

- Designing and building new end-to-end product features, while maintaining and extending existing features
- Collating information required from clients in order to successfully deliver the project to a high standard
- Assisting the software support team for bugs, taking on board feedback and researching new features
- Gain a familiarity with a varied tech stack including C#, Bitbucket, Git and Team City
- To learn and to share in a collaborative working environment with an experienced team

Essential Skills:

- C#
- WinForms
- Object Orientated Programming (OO Programming)
- JavaScript
- HTML, PHP

Requirements:

- Ideally 2+ years of working as a software developer in a commercial environment - we will consider less experienced developers
- Experience working on a hosted product
- The desire to write well written, testable and maintainable code
- A passion for quality

- Team working ability
- Problem solving
- The desire to learn and improve
- Portfolio of existing projects
- A keen eye for detail and accuracy/consistency in layout and information
- Good communication skills.

Desirable:

- CSS, XML
- JQuery, AJAX
- ASP.Net
- Databases - SQL 2012/2016 (Writing SQL statements)
- Experience in developing CRM systems
- Object serialisation (JSON)
